**Subject:** Microsoft Antitrust Proposal offers Schools No choice

US DOJ,

Please do NOT accept Microsoft terms to buy used or refurbished computers for schools. This will force schools to accept more bad and old microsoft garbage. This would give Microsoft a further advantage instead of a viable solution.

If instead, Microsoft would give money to the schools, then the schools could decide for themselves what would be best for them--Not dictated by microsoft.

Thank you for your consideration,  
Keith Wurzbacher
